

2024 Annual Assembly Disclosure Mitigation Report

Standards for Integrity and Independence in Accredited Continuing Education Background: Since healthcare professionals serve as the trusted authorities when advising patients, they must protect their learning environment from industry influence to ensure they remain true to their ethical commitments. Many healthcare professionals have financial relationships with ineligible companies. By identifying and mitigating relevant financial relationships, we work together to create a protected space to learn, teach, and engage in scientific discourse free from influence from organizations that may have an incentive to insert commercial bias into education. In order to participate as a person who was in a position to control the educational content of the 2024 Annual Assembly of Hospice and Palliative Care, planners, faculty and reviewers were required to disclose all financial relationships with any ineligible companies that they had over the past 24 months regardless of whether the individual viewed the financial relationship(s) as relevant to the accredited educational content. Ineligible companies were defined as those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients. There was no minimum financial threshold for individuals to disclose financial relationships with ineligible companies. All planner, faculty, author and reviewer disclosure information was reviewed to determine whether the individual's financial relationship(s) was relevant to the accredited continuing education of the 2024 Annual Assembly. Note: the identification of relevant financial relationships did not necessarily mean that individual was unable to participate in the planning and implementation of the 2024 Annual Assembly. Accreditation standards required that relevant financial relationships be mitigated prior to individuals assuming their role in the 2024 Annual Assembly to prevent commercial bias and disclose the presence or absence of all relevant financial relationships to learners prior to the activity. For more information on the Standards for Integrity and Independence in Accredited Continuing Education, please visit <https://www.accme.org/standards-resources>.
